

Process Simulation Cup

Have an impact. Be a leader. Become a PSC Ambassador.

A PSC Ambassador is a university lecturer, a teaching assistant or an industry practitioner who uses a commercial process simulation software for teaching, training and at work.

The ambassador promotes innovation, creative thinking and best practices in education of young professionals through introducing students, teachers, teaching assistants and colleagues to the PSC challenge.

The ambassador believes in the importance of equipping future generation of process engineers with an adequate training of process simulation software.

The ambassador uses PSC in the workplace, classroom or has incorporated the PSC into the curriculum as:

- Class graded/nongraded exercise
- Group graded/nongraded exercise
- Add-on class training tool
- Add-on individual training tool

PSC Ambassador uses/refers to PSC and its initiatives in:

- Presentations
- Research
- Workshops
- Publications
- Student events

The ambassador collaborates with the Process Simulation Cup Team and supports the promotion and furthering globally the PSC challenge, PSC brand and related initiatives.

All PSC Academic Ambassadors are recognized for their engagement and contribution to the PSC community by being introduced to the Hall of Fame and Meet the Team pages on the PSC website.
