

PSC

Process Simulation Cup

PROCESS SIMULATION CUP FOR TEACHERS

PSC, an international student competition, is a unique process simulation training tool, which prepares process engineering students for the industry. Students are asked to optimize a given process which emulates the modern challenges relevant to engineering professionals.

PSC FOR YOUR CURRICULUM CONTRIBUTION

- Real industry data packaged into a simulation task
- Industry-focused skills development
- Innovative and motivating teaching method
- More and better learning outcomes
- Theory meets practice

PSC FOR CLASSROOM PROJECTS

Incorporate PSC into your curriculum and make it a special feature of your teaching course. We will dedicate and manage one of our PSC task phases especially for your students. Let us know when you would like the 2 weeks PSC task phase to happen and we'll take care of everything.

PSC AS A NOVEL ASSESSMENT TOOL

Use PSC as a grading tool:

- Individual or group nongraded exercise
- Add-on class/individual training tool to increase ECTS workload
